If you use Cisco, Webex Calling, Microsoft, Avaya, or another leading on-prem or cloud-based UC platform, *you need* ISI's powerfully smart & easy-to-use solution.

# Hidden telecom costs can take a big slice and leave you in the dark about usage

Infortel Select helps you truly understand your telecom usage and expense, so you make the most intelligent, and profitable, business decisions

## Problem:

- Organizations need visibility into telecom spend by department or cost center.
- Some organizations need to chargeback telecom costs to tenants or vendors.
- Professional services, such as law, accounting, public relations and other businesses need accurate and easy views of billable calls.

# **Solution Overview:**

### Click to Learn More

Infortel Select's powerful cost allocation and chargeback features serve up organizational summary, location roll-up, cost center, tenant, or customer invoices, and exception reporting to identify abuse or misuse. And, the an easy-to-use interface is optimized for line of business, not just your IT department. Allocate variable usage costs, fixed equipment costs and one-time charges, see your telecom spend broken out across your organization, and get the most value from your telecom system.

# **Key Infortel Select Benefits**

- Accurate rating of voice and video call events based upon the actual telecom expense or company-defined custom rates
- Associate each call event down to the individual employee and department for accurate organizational roll-up
- Itemize cost allocation of services to users, tenants, clients, or projects

- Replace the inequity of headcount-based chargeback with a true usage-based cost allocation approach
- Assign recurring fixed equipment or service fees to each user, as well as one-time charges like activation or MAC work
- Export allocation or billing files to a general ledger or time and billing system to facilitate automated chargeback
